Nuclear Engineering and Design

Contents of Volume 151

CONTENTS OF ISSUE 151(1)

Papers Dedicated to Dr. Novak Zuber on the Occasion of his 71st Birthday

Introduction, *S. Levy and T.G. Theofanous* xiii

Dedications, *M. Ishii, R.B. Duffey, F. Mayinger and F. Staub* xv

The particle pressure of arrays in a potential flow, *G.B. Wallis* 1

Analysis of the bubbly/slug flow regime transition, *S. Kalkach-Navarro, R.T. Lahey, Jr. and D.A. Drew* 15

Scaling single-state variable catastrophe functions: an application to two-phase natural circulation, *J.N. Reyes, Jr.* 41

Fluid-to-fluid scaling for a gravity- and flashing-driven natural circulation loop, *G. Yadigaroglu and M. Zeller* 49

Interfacial area in bubbly flow: experimental data and correlations, *J.M. Delhaye and P. Bricard* 65

Internal structure and interfacial velocity development for bubbly two-phase flow, *G. Kocamustafaogullari and W.D. Huang* 79

Some challenges to the thermal–hydraulic codes, *Y.-Y. Hsu* 103

Integral methods for simulating transient conduction in nuclear reactor components, *W. Wulff* 113

Non-stationary outflow and rarefaction waves in flashing liquid, *R.I. Nigmatulin and K.I. Soplenkov* 131

Validation of the Engineering Plant Analyzer methodology with Peach Bottom 2 stability tests, *U.S. Rohatgi, A.N. Mallen, H.S. Cheng and W. Wulff* 145

Benchmarking and qualification of the NUFREQ–NPW code for best estimate prediction of multichannel core stability margins, *R.P. Taleyarkhan, A.F. McFarlane, R.T. Lahey, Jr. and M.Z. Podowski* 157

Water level measurement uncertainty during BWR instability, *R.C. Torok, T.C. Derbidge and J.M. Healzer* 173

Two-phase flow in porous media with phase change: post dryout heat transfer and steam injection, *I. Catton and M. Chung* 185

Integral analysis of debris material and heat transport in reactor vessel lower plenum, *K.Y. Suh and R.E. Henry* 203

Stepwise integral scaling method for severe accident analysis and its application to corium dispersion in direct containment heating, *M. Ishii, G. Zhang, H.C. No and F. Eltwila* 223

Heat transfer during molten corium–concrete interactions, *S. Levy* 235

Critical heat flux through curved, downward facing, thick walls, *T.G. Theofanous, S. Syri, T. Salmassi, O. Kymäläinen and H. Tuomisto* 247

Technical Engineering Note

Concerning the location of void detachment in annuli, *G.S. Lellouche* 259

Instructions to Contributors 265

CONTENTS OF ISSUES 151(2–3)

Extended and Updated Selected Papers from the 18th MPA-Seminar, Stuttgart, Germany, October 8 and 9, 1992

Preface, *K. Kussmaul* xxi

Failure behaviour of thick-walled, austenitic pipe bends under cyclic bending loading at constant internal pressure, *H. Diem, D. Blind, E. Roos, O. Wachter and E. Tolksdorf* 269

Fracture mechanics evaluation of cracked components with consideration of multiaxiality of stress state, *X. Schuler, D. Blind, U. Eisele, K.-H. Herter and W. Stoppler* 291

Crack growth and fracture behaviour of pipes with circumferential defects under internal pressure and superimposed alternating bending load, *W. Stoppler, D. Sturm, K. Hippelein and A. de Boer* 307

Application of material models and assessment of strains in a surgeline under cyclic thermal loading, *H. Kordisch, G. Nagel, J.-G. Blauel, H. Stöckl and M. Sester* 321

Investigations of creep ratcheting on thick-walled tubes, *G. Breitbach, A. Schmidt-Plutka, F. Schubert and H. Nickel* 337

Phase 2 of the International Piping Integrity Research Group programme, *B.J. Darlaston* 347

Development of a database of pipe fracture experiments, *P. Scott, G. Wilkowski, D. Sturm and W. Stoppler* 359

Safety analysis of reactor pressure vessels considering irradiation effects and improved temperature calculations for PTS, *G. Bartholomé, M. Erve, R. Hertlein, E. Keim and A. Schöpper* 373

Large stable crack growth in fracture mechanics specimens, *W. Brocks, A. Eberle, S. Fricke and H. Veith* 387

Technical Engineering Note

Role of irradiated materials data in performing reactor vessel fracture toughness analysis, *A.L. Lowe, Jr. and K.K. Yoon* 401

Application of leak-before-break concept to integrity and safety of PWR primary piping with WWER 1000, *V.A. Kiselev, E.Yu. Rivkin, Yu.I. Smirnov, L.M. Sokov and A.V. Sudakov* 409

Analysis of the failure behaviour of longitudinally flawed pipes and vessels, *W. Stoppler, D. Sturm, P. Scott and G. Wilkowski* 425

J_R curves of the low alloy steel 20 MnMoNi 5 5 with two different sulphur contents in oxygen-containing high temperature water at 240 °C, *R. Schellenberger and P. Deimel* 449

Stress corrosion cracking of mild steel in high pressure, high temperature water during slow strain rate testing, *H. Gladen and H. Kaesche* 463

Structural dynamics and fracture mechanics calculations of the behaviour of a DN 425 test piping system subjected to transient loading by water hammer, *K. Kussmaul, E. Kobes, H. Diem, D. Schrammel and S. Brosi* 473

Technical Engineering Note
Determination of crack initiation and crack resistance using compact specimens, and comparison with results of numerical simulation of dynamically loaded wide plates, *K. Kussmaul, T. Link, A. Klenk and T. Nguyen-Huy* 489

Technical Engineering Note
Examples of the evolution of materials for nuclear applications: metallurgical improvement of 16MND5 steel and new technologies for manufacturing heavy components, *P. Bocquet, A. Cheviet and R. Dumont* 503

Technical Engineering Note
Manufacturing and material properties of ultralarge size forgings for advanced BWRPV, *K. Susuki, I. Sato and H. Tsukada* 513

Technical Engineering Note
Crack growth measurements on components under cyclic loading: comparison of different methods, *B. Kluttig, H. Steinmill, W. Stoppler and H.P. Keller* 523
Flaw detection ability of NDT techniques on clad surfaces of reactor pressure vessels, *T. Just* 531
Current in-service inspections of austenitic stainless steel and dissimilar metal welds in light water nuclear power plants, *L. von Bernus, W. Rathgeb, R. Schmid, F. Mohr and M. Kröning* 539

Technical Engineering Note
Ultrasonic inspections of fuel alignment pins, *W. Rathgeb and R. Schmid* 551
